Dear Employer:

Everett Community College has been providing services to the community since 1941. As one of the oldest community colleges, the quality of education at Everett Community College has a proven record and is recognized for its excellence.

The internship program allows students to earn college credit for work experience related to their major course of study. These may be paid or unpaid experiences structured to create a learning environment for the student as well as for the employer. Using real-world experiences to apply concepts and skills learned in the classroom is a tremendous benefit for everyone and provides skilled employees to business, industry, government and non-profit organizations.

Depending on the type of internship that you can provide, you can request a minimum of technical skills, certifications, and education level and also request a resume and an interview. Upon further consideration, you can conduct a background check for security reasons.

Student interns are expected to perform tasks with a positive attitude, to complete all tasks in an exemplary manner, and to exceed your expectations. The students are clearly briefed that the internship does not guarantee continued part-time or full-time employment by you or by Everett Community College. It is a learning experience related to their course of study.

The attached information will answer questions you may have about the Internship program at MechaWA TechHire. To better assist students and business, please us for more information.

We look forward to a partnership with you and your business. Thank you for your interest in the Internship program. Your support for our students and programs is sincerely appreciated.

Sincerely,

Employment Solutions Team
MechaWA TechHire
Thank you for your interest in MechaWA TechHire’s Internship Program. Whether you are new to hosting interns or have worked with interns in the past, this guide will assist you with working with the students and the college.

General Internship Information

The MechaWA TechHire group wants to ensure that our students are prepared to enter the workforce after graduation. Supporting them in an internship opportunity will allow the college and the employer to work together and ensure we are providing our community with the most skilled workers.

The student and the employer both benefit from the internship experience. The student will benefit by gaining hands-on, real-world experience. You, as the employer, benefit in several ways:

- You will become a community partner with MechaWA TechHire, which will provide your company with increased visibility and an enhanced image for your organization on campus and in the community.

- You will have an outstanding source of motivated students.

- Your company will receive new perspectives from well-trained, enthusiastic students.

- You will have access to quality students for temporary positions and a cost-effective method of recruiting potential employees.

A MechaWA TechHire student receives credit for internships which usually last the length of an academic quarter. For every 50 hours worked, the student will earn one credit. The number of credits a student receives depends on the student's program.

The following pages will provide you with an overview of steps to take in order to participate in MechaWA TechHire’s internship program. We will be there with you every step of the way, providing any guidance and support you need. Do not hesitate to contact us with questions or concerns.
Employer Internship Eligibility Requirements

The first step in the internship process is to ensure you meet the criteria to have an intern at your company. Employers must meet the following criteria before entering into an internship agreement with MechaWA TechHire:

• Be a licensed business with the State of Washington or a local municipality that follows applicable laws and codes.

• Have policies in place that conform to federal, state, and local EEOC non-discrimination and harassment laws.

• Demonstrate a safe work environment that complies with applicable OSHA/WISHA regulations.

• Be willing to submit to a pre-internship site visit/evaluation.

Along with MechaWA TechHire’s requirements, the Department of Labor (DOL) has established criteria for differentiating between an employee entitled to minimum wage and a learner/trainee who, while an employee, may be unpaid. The criteria are:

• The training, although it includes actual operation of the facilities of the employer, is similar to that which would be given in a vocational school.

• The training is for the benefit of the student.

• The student does not displace regular employees but works under the close observation of a regular employee or supervisor.

• The employer provides the training and derives no immediate advantage from the activities of the student and, on occasion, the operations may actually be impeded by the training.

• The student is not necessarily entitled to a job at the conclusion of the training period.

• The employer and the student understand that the student is not entitled to wages for the time spent in training.
Establish Employer Eligibility with MechaWA TechHire

In order to be an approved internship site for MechaWA TechHire students, complete the following steps:

1. Read through the Employer Internship Handbook.
2. Meet the employer internship eligibility requirements on the previous page.
3. Contact an Employment Solutions team member about your interest.
4. Schedule a pre-internship site evaluation with an Employment Solutions team member.
5. Complete and sign the MechaWA TechHire Internship Affiliation Agreement with the Internship coordinator or representative.

Recruit MechaWA TechHire Interns

Once employer eligibility is established, the employer is ready to advertise for student interns:

1. Send your internship job description to us via email. Required items for your posting include:
   - Employer contact information
   - Range of hours to be worked (50 hours per quarter is 1 credit)
   - A range for wage/salary if applicable
   - Job description and qualifications
   - Application instructions
2. You will be contacted by an Employment Solutions team member within 3-5 business days.
3. Students will contact the employer directly or through the Employment Solutions Team, based on your instructions.
4. Review applications and interview students who meet your criteria.
5. Offer the position to the selected candidate.
6. Have the student fill out the Student-Employer Agreement. The student, the employer, and the internship instructor will all sign this agreement.

The Internship Begins

Once you have selected an intern, it is your responsibility to ensure the intern is provided with a safe and constructive learning experience that will benefit you and the student. Some steps to consider are:

1. Provide an orientation on the first day. A sample orientation outline can be found on page 7.
2. Introduce the student to first-line supervisor.
3. Provide all applicable safety training and documentation.
4. Immediately contact the internship instructor if scope of work, supervisor, or job location changes.
5. Follow emergency protocol if the intern is injured on the job. Emergency protocol can be found on page 7.
6. Verify work hours and sign the Internship Time Sheet on a weekly basis.

To ensure a smooth transition for the employer and the student intern, the internship instructor will take the following actions:

1. Ensure necessary paperwork is completed by the student to document the Student Learning Objectives.
2. Follow up with the employer/direct supervisor to ensure intern is meeting overall expectations, and conduct a site or phone visit.
3. Assist the employer or intern with any issues that may arise during the internship.
4. Ensure all documentation regarding student performance, hours worked, and end-of-internship evaluations are completed by the student and the employer.

Sample Orientation Outline

Students may be unfamiliar with the activities, environment, and mission of your company. Although many of them have work experience, they may or may not have been exposed to organizational behavior, the need for confidentiality, or the importance of teamwork. Offering a solid orientation will provide the intern with insight into how your organization works. This will help the intern become a productive member of your team sooner.

1. Explain the mission of the company
   • How can the intern play a role in obtaining the objectives of the company?
2. Describe the organizational structure
   • How does the intern fit into the organization? To whom will the intern report? Where does the intern go to get questions answered?
3. Outline rules and policies
   • What is the intended schedule for the intern?
   • Is there a dress code the intern needs to follow?
4. Provide safety training
   • Emergency escape routes
   • Other training where applicable
5. Define the Intern’s role and responsibilities
   • What projects will the intern be assigned?
   • What resources and supplies are available to the intern?
Emergency Information

If an injury occurs to a student intern while at the internship site, it must be immediately reported to Security at 425-388-9990.

In the event of a serious or life-threatening injury that requires immediate or emergency medical attention, call 911 or the appropriate emergency response service for the internship location.

Frequently Asked Questions

1. **How will my company benefit from having a MechaWA TechHire Intern?**
   You will become a community partner with MechaWA TechHire which will provide your company with increased visibility and an enhanced image for your organization on campus and in the community. You will have an outstanding source of motivated students. Your company will receive new perspectives from well-trained, enthusiastic students. You will have access to quality students for temporary positions and a cost effective method of recruiting potential employees.

2. **How long do internships last?**
   An internship is generally the length of an academic quarter (10 weeks) or when the student meets the requirements of their course and the needs of the employer. Students earn one credit for every 50 hours of work.

3. **How do I hire a MechaWA TechHire intern?**
   Employers will send job description to the Employment Solutions Team. You will determine your hiring process and interview potential interns who contact you.

4. **Do I have to pay my intern?**
   Internships can be paid or unpaid. However, since many students are paying for all or part of their college costs, paid internships are highly sought. We ask that you consider the value you'll get from the intern and pay accordingly. Some employers prefer to pay an hourly wage while others provide a stipend upon completion. If you have a mechatronics internship, please ask about our DOL employer wage reimbursement program.

5. **What are the guidelines for unpaid internships?**
   The U.S. Department of Labor (DOL) has developed six criteria for differentiating between an employee entitled to minimum wage and a learner/trainee who, while an employee, may be unpaid. The criteria are:
   - The training, although it includes actual operation of the facilities of the employer, is similar to that which would be given in a vocational school.
   - The training is for the benefit of the student.
• The student does not displace regular employees, but works under the close observation of a regular employee or supervisor.
• The employer provides the training and derives no immediate advantage from the activities of student, and, on occasion, the operations may actually be impeded by the training.
• The student is not necessarily entitled to a job at the conclusion of the training period.
• The employer and the student understand that the student is not entitled to wages for the time spent in training.

6. **What are my responsibilities as the employer during an internship?** Once an intern has been selected, you will need to sign the *Student-Employer Agreement* form. You will also need to provide the student with meaningful and challenging work related to the student’s field of study. You must assign a supervisor who will be available to the student for guidance and support. Participating employers must provide a safe workplace in accordance with state and federal EEO laws.

   At the end of the internship, you will need to fill out the *Student Performance Evaluation* and give it to the student. He/she will turn it into their internship instructor along with the Internship Time Sheet that you sign weekly.

7. **What are characteristics of a good internship experience?** Ensuring that the student is aware of the company culture, policies, and procedures is one of the keys to a good internship experience. One way to achieve this is through an orientation.

   Another key is to plan ahead and provide the intern with suitable projects, as well as to allow the student intern to observe professionals in action.
STUDENT–EMPLOYER AGREEMENT
To be filled out by the student

Complete and return this form to your internship instructor at the start of your internship.

All parties agree to the following information:
1. Employer will provide the student with a safe work environment that complies with applicable OSHA/WISHA regulations.
2. The student will receive one credit for every 50 hours worked for satisfactory completion of work and learning experiences.
3. The student will be given the opportunity to gain a broad experience and if the internship duties are altered from the original job description, the employer will contact the Internship Coordinator.
4. A MechaWA TechHire representative will visit the work site at least once during the placement to evaluate the student’s progress.
5. At the end of the quarter, the employer will provide the college with the following items:
   a. Internship Time Sheet
   b. Student Performance Evaluation
6. Student will comply with the requirements of the position and the internship work experience program responsibilities.
7. The employer has the right to discharge the student for cause after consultation with the student and the internship instructor.

The undersigned have read, understand, and acknowledge this agreement.

DEFINITIONS OF PERFORMANCE RATING CATEGORIES

OUTSTANDING - The intern has exceeded all of the performance expectations for this factor and has made many significant contributions to the efficiency and economy of this organization through such performance.

EXCEEDS EXPECTATIONS - The intern regularly works beyond a majority of the performance expectations of this factor and has made significant contributions to the efficiency and economy of this organization through such performance.

MEETS EXPECTATIONS - The intern has met the performance expectations for this factor and has contributed to the efficiency and economy of this organization.

NEEDS IMPROVEMENT - The intern has failed to meet one or more of the significant performance expectations for this factor.

UNSATISFACTORY - The intern has failed to meet the performance expectations for this factor.
The Automotive Manufacturing Technical Education Collaborative (AMTEC)  
(A National Science Foundation Advanced Technological Education Center)  

Industry Partner Agreement  

_____________________________joins the Automotive Manufacturing Technical Education Collaborative (AMTEC) as an industry related partner, in support of the National Science Foundation’s (NSF) goal of improving science and technology education by:

Supporting AMTEC’s Main Goals:

1. Create business/industry partnerships in delivering core mechatronics (integrated systems) maintenance technical education that meets the high priority needs of automotive manufacturers and suppliers.

2. Increase secondary to postsecondary transition and from postsecondary to employment to meet industry needs.

3. Implement a collaborative support system to sustain and replicate the AMTEC model.

4. Create and sustain the support process for the automotive core integrated systems technology education through assessment and continuous improvement.

In support of these goals,______________________________will:

1. Whenever possible commit to attend or have a member of their team attend AMTEC Academies. AMTEC typically has 2 three-day academies per year.

2. Acknowledge AMTEC and the NSF to the extent possible in all products, deliverables, and materials produced as a result of working with AMTEC.

3. Provide advisory input into the relevance, quality, and service of AMTEC outcomes and products and services as requested by AMTEC.

4. Support the AMTEC mission by working with college and industry partners to advance the Center goals by:

   a. Identifying and defining opportunities for using the AMTEC programs and tools in training the manufacturing workforce.

   b. Collaborating with your local college to align career pathways with employment opportunities essential to the manufacturing economy.
Industry Partner Agreement

c. Support career pathway development and outreach activities conducted by the local college.
d. Support application of AMTEC programs by local suppliers and other industries.
e. Encourage employers to consider qualified AMTEC participants that meet employer criteria for positions as they become available.

5. Will maintain the integrity and proprietary nature of all AMTEC products including research, curriculum, assessments, and equipment.
